# ANNUAL STATEMENT FOR THE YEAR 2023 OF THE MIDLAND NATIONAL LIFE INSURANCE COMPANY 

## NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern
A. Accounting Practices

The financial statements of Midland National Life Insurance Company ("Midland National" or "the Company") have been prepared in conformity with the NAIC Annual Statement Instructions and the NAIC Accounting Practices and Procedures manual, subject to any deviations prescribed by its domiciliary state, lowa, as follows:

1. Iowa Bulletin 07-06 - In September 2006 the Commissioner of Insurance of the State of lowa issued Bulletin 07-06 that allows a prescribed practice for lowa domiciled companies. This prescribed practice instructs insurance companies to use other than market value for assets held in separate accounts where general account guarantees are present on such separate accounts. Based on this the Company adopted Bulletin $07-06$ in 2006 and presents the assets on its BOLI, PRT and RILA Separate Accounts at book value. The impact of applying this prescribed practice had no impact on 2023 statutory net income; however, Capital and Surplus as of December 31, 2023 is increased by $\$ 253,579,511$ as a result of this prescribed practice. The impact of applying this prescribed practice had no impact on 2022 statutory net income; however, Capital and Surplus as of December 31,2022 is increased by $\$ 358,693,642$ as a result of this prescribed practice.
2. Iowa Administrative Code 191 - Chapter 97, "Accounting for Certain Derivative Instruments Used to Hedge the Growth in Interest Credited for Indexed Insurance Products and Accounting for the Indexed Insurance Products Reserve" ("IAC 191-97"). This prescribed practice allows insurance companies domiciled in lowa to account for eligible derivative assets at amortized cost, if the insurance company can demonstrate they meet the criteria for an economic hedge. Eligible derivative assets include call or put options that are purchased to
hedge the growth in interest credited to an indexed product as a direct result of changes in the related external index or indices, or call or put options that are written to offset all or a hedge the growth in interest credited to an indexed product as a direct result of changes in the related external index or indices, or call or put options that are writen to offset all or a portion of a purchased call or put option. Other derivative instruments such as index futures, swaps and swaptions that may be used to hedge the growth in interest credited to the policy
as a direct result of changes in the related indices would still be accounted for at fair value since an amortized cost for those instruments does not exist. IAC 191-97 also prescribes that insurance concol term is zero, regardless of the observable market for such option(s). At the conclusion of the index term, credited interest is reflected in the reserve as realized, based on actual index performance. This prescribed accounting practice must be applied to both the indexed reserves and the call/put options used to hedge indexed insurance products. The impact of applying this prescribed practice dereased the Company's statutory net income for the twelve months ended December 31, 2023 by $\$ 348,605,856$ and the cumulative effect on Capital and Surplus a D months ended December 31, 2022 by $\$ 306,761,783$ and the cumulative effect on Capital and Surplus at December 31, 2022 was an increase of $\$ 71,615,109$.

Under either the NAIC basis or the IAC 191-97, the Company elects to establish a voluntary reserve to offset the timing mismatch between the derivative instruments and the hedged liabilities, if that mismatch results in an increase in surplus. Under the IAC 191-97, a timing mismatch occurs related to the emergence of earnings. The impact of equity markets is reflected in investment income from futures during the policyholder's contract years, but is not reflected in the reserve until the policy anniversary, at which time the index credit is applied to the account value. The voluntary reserve established as of December 31, 2023 is $\$ 6,373,762$ which offsets the portion of investment income on futures that has been determined to represent earnings that will be used to fund index credits that have not yet been applied to policy account balances. This eliminates the timing mismatch of the assets and liabilities calculated in accordance with IAC 191-97. Under the NAIC basis, a voluntary reserve of $\$ 283,364,509$ would have been established as of December 31, 2023 to eliminate the timing mismatch of the assets and liabilities. The impact of applying this prescribed practice, net of the effect of the difference between the above mentioned voluntary reserve and the voluntary reserve that would have been established without the prescribed practice resulted in a decrease to the Company's statutory net income of $\$ 71,615,109$ for the twelve months ended December 31, 2023 and there was no cumulative impact on the Company's Capital and Surplus at December 31, 2023. The voluntary reserve established as of December 31, 2022 was $\$ 0$ as the timing mismatch between the futures and the hedged liabilites resulted in a $\$ 1,370,214$ decrease to the Company's statutory net income and surplus calculated in accordance with IAC 191-97. Under the NAIC basis, a voluntary reserve of $\$ 0$ would have been established as of December 31, 2022 as the timing mismatch between futures and hedged liabilities would have resulted in a $\$ 72,985,323$ decrease to the Company's statutory net income and surplus. The impact of applying this prescribed practice, net of the effect of the difference between the above mentioned voluntary reserve and the voluntary reserve that would have been established without the prescribed practice resulted in an increase to the Company's statutory net income of $\$ 71,615,109$ for the twelve months ended December 31, 2022 and increased the Company's Capital and Surplus by $\$ 71,615,109$ at December 31, 2022. Because it is established under NAIC SAP, the effects of voluntary reserves are not included in reconciliation lines (2) or (6) in the following table.
3. Iowa Administrative Code 191 - Chapter 43, "Annuity Mortality Tables For Use in Determining Reserve Liabilities For Annuities" ("IAC 191-43") allows a prescribed practice for lowa domiciled companies. This prescribed practice allows insurance companies domiciled in lowa to use the Annuity 2000 Mortality Table for determining the minimum standard of valuation for annuities issued during 2015. SSAP 51 requires the 2012 IAR Mortality Table for determining the minimum standard of valuation for annuities issued on or after January 1, 2015. The impact of applying this prescribed practice increased the Company's statutory net income for the twelve months ended December 31, 2023 by $\$ 150,307$ and the cumulative effect on Capital and Surplus at December 31, 2023 was an increase of $\$ 20,236,751$. The impact of applying this prescribed practice decreased the Company's statutory net income for the twelve
months ended December 31, 2022 by $\$ 1,247,232$ and the cumulative effect on Capital and Surplus at December 31,2022 was an increase of $\$ 20,176,444$. months ended December 31, 2022 by $\$ 1,247,232$ and the cumulative effect on Capital and Surplus at December 31, 2022 was an increase of $\$ 20,176,444$.
A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of lowa is shown below.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.
C. Accounting Policy

Life premiums are recognized as income over the premium-paying period of the related policies. Annuity considerations are recognized as revenue when received. Expenses incurred in connection with acquiring new insurance business, including acquisition cost such as sales commissions, are charged to operations as incurred.

In addition, the Company uses the following accounting policies:
(1) Short-term investments are stated at amortized cost.
(2) Bonds not backed by other loans are stated at amortized cost using the interest method. The Company does not hold any SVO-Identified bond ETF's.
(3) Common stocks are stated at market except that investments in stocks of uncombined subsidiaries and affiliates (other than insurance subsidiaries) in which the Company has an interest of $20 \%$ or more are carried on an equity basis.
(4) Preferred stocks are stated in accordance with the guidance provided in SSAP No. 32R, Preferred Stock.
(5) Mortgage loans on real estate that are not in default are stated at the aggregate unpaid balance. Mortgage loans in default are stated at the lower of aggregate unpaid balance or market.
(6) Loan-backed bonds, CMO's and other structured securities are stated at amortized cost using the interest method including anticipated prepayments.
(7) The Company has three subsidiary life insurance companies, which are valued at their statutory capital and surplus.
(8) The Company has ownership interest in joint ventures and limited partnerships. The Company carries these interests based on the underlying audited GAAP equity of the investee.
(9) Certain derivatives are valued in accordance with IAC 191-97; all others are valued in accordance with the NAIC Accounting Practices and Procedures Manual and the Purpose and Procedures Manual of the SVO.
(10) The Company has no premium deficiency calculation for Individual and Group, Accident and Health Contracts.

## ANNUAL STATEMENT FOR THE YEAR 2023 OF THE MIDLAND NATIONAL LIFE INSURANCE COMPANY

(4) All impaired securities (fair value is less than cost or amortized cost) for which an other than temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

(5) The Company continues to review payment performance, delinquency rates, and credit enhancements within the security structures and monitored the credit ratings of all its loan-backed security holdings. The Company performs various stress tests on the cash flow projections for loan-backed securities and in situations where it is determined the projected cash flow cannot support the contractual amounts due to the Company, other-than-temporary impairment is recognized. The Company recognized \(\$ 15,332,557\) of other-than-temporary impairments on loan-backed securities during 2023. In situations where the projected cash flows indicated the Company will receive the amounts it is contractually due and the Company has the intent and ability to hold the securities until recovery of its amortized cost, an other-than-temporary impairment is not recognized
E. Dollar Repurchase Agreements and/or Securities Lending Transactions

The Company recognizes the securities lending program as a repurchase agreement which is accounted for as a secured borrowing and is discussed under Note 5 F .
F. Repurchase Agreements Transactions Accounted for as Secured Borrowing
(1) As part of its investment strategy, the Company enters into repurchase agreements to increase the Company's invest returns. The program generates incremental spread income while only marginally increasing the aggregate portfolio credit exposure. Company policy requires a minimum of \(100 \%\) of the fair value of securities sold (less a haircut) under repurchase agreements to be maintained as collatera
The program results in a marginal increase in credit and liquidity risks. The majority of the repurchase agreements are evergreen and allow the Company the option to extend the agreements on pre-arranged terms which mitigates prepayment exposure. The Company's asset portfolio is sufficiently liquid to be able to absorb situations where the maturity dates of the liability to return collateral is mismatched from the maturity of the invested asset. In addition, the Company's membership in the FHLB of Des Moines provides additional low cost liquidity.

E. Defined Contribution Plans
(1) The Company offers a 401 (k) plan to qualified employees. The Company does not provide a contribution match so there is no cost for this plan.
(2) The Company has a deferred compensation program for select senior officers. The level of participation is based upon company growth and/or statutory maximum contribution levels for qualified retirement programs.
(3) The Company has a long-term incentive plan for select senior officers. The plan provides compensation based upon the achievement of specific financial results.
(4) The Company has non-qualified non-contributory defined benefit retirement plans covering certain regional sales directors, general agents, and agents. The benefits are based on the agent's years of service and the annual premium produced by the agent still in force at his retirement. Since the plans are provided for the benefit of independent contractors, the plans are not tax-qualified plans under the Internal Revenue Code and are not subject to ERISA. The Company's funding and accounting policy is to make annual contributions based on the maximum and minimum levels prescribed by the Internal Revenue Code and ERISA, as if they are qualified plans, and to charge such contributions to expense in the year made. As of December 31, 2023 and 2022, the plan's accumulated benefit obligation was \(\$ 19,068,441\) and \(\$ 19,182,102\), respectively.
(5) The Company has a non-qualified non-contributory incentive deferral compensation plan for which all Regional Sales Directors are eligible. Since the Plan is provided for the benefit of independent contractors, the Plan is not tax-qualified under the Internal Revenue Code and it is not subject to ERISA. The Company contributes a percentage of each participating Regional Sales Director's qualifying renewal compensation to the Plan. Upon retirement, the accumulation of these contributions will purchase a retirement benefit, provided the Regional Sales Director's annual compensation shall have exceeded the appropriate minimum requirement for each of the ten years. No contributions were made in 2023 or 2022.
(6) The Company has an agent's non-qualified deferred compensation plan. Since the plan is provided for the benefit of independent contractors, the plan is not a tax-qualified plan under the Internal Revenue Code and is not subject to ERISA. Under the terms of the plan, agents eligible to participate in the play may elect to defer receipt of certain first year commissions that would otherwise be payable to the agent. A separate account is established for each agent participating in the plan to which all deferrals of the agent are credited plan, but the Company has established a trust for the purpose of facilitating payments under the plan. The assets of the trust are assets of the Company and are subject to the claims and creditors of the Company as provided in the trust agreements. No agent or beneficiary of an agent has any beneficial ownership or preferred claim on the assets of trust. The trust is intended to assist the Company in meeting the obligations under the plan and substantially conforms to the terms of the model trust described in the Internal Revenue Service Revenue Procedure 92-64 or any successor model trust. (1) Recognition of the existence of the Act

The Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) was signed into law in December of 2003. The Act included the following two new features to The Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) was signed into law in December of 2003. The Act included the following
a. A federal subsidy (based on \(28 \%\) of an individual beneficiary's annual prescription drug cost between \(\$ 250\) and \(\$ 5,000\) ), which is not taxable, to sponsors of retiree healthcare benefit plans that provide a prescription drug benefit that is a least actuarially equivalent to Medicare Part D ; and
b. The opportunity for a retiree to obtain a prescription drug benefit under Medicare

The Company has determined that, for the majority of the plan participants, the drug benefits provided by its existing postretirement health plan are actuarially equivalent to the new Medicare benefit, and as a result the Company is eligible for the government subsidy. Accordingly, the plan's accumulated postretirement benefit obligation was reduced upon the was treated as a deferred experience gain, which will be amortized as a reduction of net periodic postretirement costs over the average remaining service period of participating employees to receive benefits under the plan

The assets and liabilities measured and reported at fair value for the Company as of December 31, 2023 are as follows
(1) Fair Value Measurements at Reporting Date

(3) The reporting entity's policy is to recognize transfers between levels at the end of the reporting period.
(4) Fair value for fixed maturity securities, preferred stocks, and common stocks is obtained primarily from independent pricing sources, SVO, vendor, broker quotes and fair value/cash flow models. Fair value is based on SVO price or quoted market prices, where available. For fixed maturities not actively traded, fair value is estimated using values obtained from models. Fair value is based on SVO price or quoted market prices, where available. For fixed maturities not actively traded, fair value is estimated using values obtained from
independent pricing services or broker quotes. In some cases, such as private placements and certain mortgage back securities, fair value is estimated by discounting expected future cash flows using a current market rate applicable to the yield, credit quality and maturity of the investments. The fail value of equity securities is based on quoted market prices, where available, and for those equity securities not actively traded, fair values are obtained from independent pricing services or from internal fair value/cash flow models.
Fair value for interest rate swaps, credit default swaps, interest rate floors and other derivatives is based on exchange prices, broker quoted prices or fair values provided by the counterparties. Variation margin accounts, consisting of cash balances applicable to open futures contracts, held by counterparties are reported at the cash balances, which is equal to
fair value.
