NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Midland National Life Insurance Company ("Midland National" or "the Company") have been prepared in conformity with the NAIC Annual Statement Instructions and the NAIC Accounting Practices and Procedures manual, subject to any deviations prescribed by its domiciliary state, Iowa, as follows:

1. Iowa Bulletin 07-06 - In September 2006 the Commissioner of Insurance of the state of Iowa issued Bulletin 07-06 that provides a prescribed practice for Iowa domiciled companies. The bulletin allows assets held in a separate account where general account guarantees are present, to be carried at other than fair value with prior approval of the commissioner. The Company has received such approval for certain assets within its bank-owned life insurance ("BOLI"), pension risk transfer ("PRT") and registered index-linked annuity ("RILA") separate accounts. As a result of that approval and in accordance with SSAP No. 56 - Separate Accounts, those certain assets held in the separate accounts are carried at the same basis they would be if they were held by the general account. The impact of applying this prescribed practice had no impact on 2025 statutory net income; however, Capital and Surplus as of December 31, 2025 is increased by $212,455,191 as a result of this prescribed practice. The impact of applying this prescribed practice had no impact on 2024 statutory net income; however, Capital and Surplus as of December 31, 2024 is increased by $299,072,616 as a result of this prescribed practice.

2. Iowa Administrative Code 191 – Chapter 97, "Accounting for Certain Derivative Instruments Used to Hedge the Growth in Interest Credited for Indexed Insurance Products and Accounting for the Indexed Insurance Products Reserve" ("IAC 191-97"). This prescribed practice allows insurance companies domiciled in Iowa to account for eligible derivative assets at amortized cost, if the insurance company can demonstrate they meet the criteria for an economic hedge. Eligible derivative assets include call or put options that are purchased to hedge the growth in interest credited to an indexed product as a direct result of changes in the related external index or indices, or call or put options that are written to offset all or a portion of a purchased call or put option. Other derivative instruments such as index futures, swaps and swaptions that may be used to hedge the growth in interest credited to the policy as a direct result of changes in the related indices would still be accounted for at fair value since an amortized cost for those instruments does not exist. IAC 191-97 also prescribes that insurance companies determine indexed annuity reserve calculations based on the Guideline 35 Reserve assuming the fair value of the call option(s) associated with the current index term is zero, regardless of the observable market for such option(s). At the conclusion of the index term, credited interest is reflected in the reserve as realized, based on actual index performance. This prescribed accounting practice must be applied to both the indexed reserves and the call/put options used to hedge indexed insurance products. The impact of applying this prescribed practice decreased the Company's statutory net income for the twelve months ended December 31, 2025 by $192,110,098 and the cumulative effect on Capital and Surplus at December 31, 2025 was a decrease of $443,667,001. The impact of applying this prescribed practice increased the Company's statutory net income for the twelve months ended December 31, 2024 by $25,433,843 and the cumulative effect on Capital and Surplus at December 31, 2024 was a decrease of $251,556,903.

Under either the NAIC basis or the IAC 191-97, the Company elects to establish a voluntary reserve to offset the timing mismatch between the derivative instruments and the hedged liabilities, if that mismatch results in an increase in surplus. Under the IAC 191-97, a timing mismatch occurs related to the emergence of earnings. The impact of equity markets is reflected in investment income from futures during the policyholder's contract years, but is not reflected in the reserve until the policy anniversary, at which time the index credit is applied to the account value. The voluntary reserve established as of December 31, 2025 is $26,431,029 which offsets the portion of investment income on futures that has been determined to represent earnings that will be used to fund index credits that have not yet been applied to policy account balances. This eliminates the timing mismatch of the assets and liabilities calculated in accordance with IAC 191-97. Under the NAIC basis, a voluntary reserve of $470,098,031 would have been established as of December 31, 2025 to eliminate the timing mismatch of the assets and liabilities. The impact of applying this prescribed practice, net of the effect of the difference between the above mentioned voluntary reserve and the voluntary reserve that would have been established without the prescribed practice resulted in no impact to the Company's statutory net income for the twelve months ended December 31, 2025 and there was no cumulative impact on the Company's Capital and Surplus at December 31, 2025. The voluntary reserve established as of December 31, 2024 is $35,575,913 which offsets the portion of investment income on futures that has been determined to represent earnings that will be used to fund index credits that have not yet been applied to policy account balances. This eliminates the timing mismatch of the assets and liabilities calculated in accordance with IAC 191-97. Under the NAIC basis, a voluntary reserve of $287,132,816 would have been established as of December 31, 2024 to eliminate the timing mismatch of the assets and liabilities. The impact of applying this prescribed practice, net of the effect of the difference between the above mentioned voluntary reserve and the voluntary reserve that would have been established without the prescribed practice resulted in no impact to the Company's statutory net income for the twelve months ended December 31, 2024 and there was no cumulative impact on the Company's Capital and Surplus at December 31, 2024. Because it is established under NAIC SAP, the effects of voluntary reserves are not included in reconciliation lines (2) or (6) in the following table.

3. Iowa Administrative Code 191 – Chapter 43, "Annuity Mortality Tables For Use in Determining Reserve Liabilities For Annuities" ("IAC 191-43"), allows a prescribed practice for Iowa domiciled companies. This prescribed practice allows insurance companies domiciled in Iowa to use the Annuity 2000 Mortality Table for determining the minimum standard of valuation for annuities issued during 2015. SSAP 51 requires the 2012 IAR Mortality Table for determining the minimum standard of valuation for annuities issued on or after January 1, 2015. The impact of applying this prescribed practice decreased the Company's statutory net income for the twelve months ended December 31, 2025 by $2,249,690 and the cumulative effect on Capital and Surplus at December 31, 2025 was an increase of $17,686,144. The impact of applying this prescribed practice decreased the Company's statutory net income for the twelve months ended December 31, 2024 by $390,917 and the cumulative effect on Capital and Surplus at December 31, 2024 was an increase of $19,935,834.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Iowa is shown below.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums are recognized as income over the premium-paying period of the related policies. Annuity considerations are recognized as revenue when received. Expenses incurred in connection with acquiring new insurance business, including acquisition cost such as sales commissions, are charged to operations as incurred.

In addition, the Company uses the following accounting policies:

(1) Short-term investments are stated at amortized cost.

(2) Bonds not backed by other loans are stated at amortized cost using the interest method. The Company does not hold any SVO-Identified bond ETF's.

(4) Preferred stocks are stated in accordance with the guidance provided in SSAP No. 32R, *Preferred Stock.*

(5) Mortgage loans on real estate, including both first and other than first liens, that are not in default are stated at the aggregate unpaid balance. Mortgage loans in default are stated at the lower of aggregate unpaid balance or market.

(6) Asset-backed securities, CMO's and other structured securities are stated at amortized cost using the interest method including anticipated prepayments.

(7) The Company has three subsidiary life insurance companies, which are valued at their statutory capital and surplus. The Company has three investment subsidiaries, which are valued at their GAAP equity.

(8) The Company has ownership interest in joint ventures and limited partnerships. The Company carries these interests based on the underlying audited GAAP equity of the investee.

(10) The Company has no premium deficiency calculation for Individual and Group, Accident and Health Contracts.

(11) Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimated and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liabilities are continually reviewed and any adjustments are reflected in the period determined.

(12) The Company has not modified its capitalization policy from the prior period.

(13) The Company does not have any pharmaceutical rebate receivables.

D. Going Concern

After evaluating the Company's ability to continue as a going concern, management was not aware of any conditions or events which raised substantial doubts concerning the Company's ability to continue as a going concern as of the filing of this statement.

Note 2 - Accounting Changes and Corrections of Errors

The Statutory Accounting Principles Working Group's new bond definition and related guidance was effective January 1, 2025. The new guidance includes a principle's based definition as to what is considered a bond and reported on Schedule D, provides new measurement guidance for investments that do not meet the definition of a bond, and requires new categorization for bonds on Schedule D. Debt securities that do not meet the definition of a bond are now reported as other invested assets on Schedule BA and are carried at the lower of amortized cost or fair value. In addition, the definition of and accounting for securities that contain characteristics of both debt and equity was clarified.

As a result of the adoption of the new guidance, the Company identified debt securities with an aggregate book adjusted carrying value of $665,732,737 that do not qualify as bonds and were therefore reclassified off Schedule D. Securities with an aggregate book adjusted carrying value of $396,663,540 that were reclassified off Schedule D and resulted in a change in measurement basis under the lower of amortized cost or fair value approach. The Company recognized an unrealized loss on these securities of ($68,667,197), in change in net unrealized capital gains (losses) as of January 1, 2025.

This new guidance also impacted debt securities held in a separate account in which assets are carried at other than fair value. The aggregate book adjusted carrying value of securities in the separate account that were reclassified off the separate account's Schedule D is $10,717,179. Securities in the separate account with an aggregate book adjusted carrying value of $446,998 resulted in a change in measurement basis under the lower of amortized cost or fair value approach, resulting in recognition of an unrealized loss of $219,903, in change in net unrealized capital gains (losses) as of January 1, 2025.

The Company also adopted the new accounting for residual tranches or interests as of January 1, 2025. This guidance allows the Company to 1) carry residual interests at the lower of amortized cost under the allowance earned yield method or fair value, or 2) apply a cost recovery method. The Company elected to carry residual interests at the lower of amortized cost under the allowable earned yield or fair value. As a result of the adoption of this guidance, the Company recognized a gain of $5,134,102, in net realized capital gains (losses) in the Statement of Operations, on the population of residual interests previously accounted for under the equity method. The new guidance is applicable to residual interests previously accounted for under SSAP No. 43 on a prospective basis with no transition impact.

During 2025, the Company recorded a correction of error related to an understatement of bond book value on a specific security during an investment accounting system conversion in 2024. The Summary of Operations in the Capital and Surplus section (page 4, line 53), contains an adjustment of a positive $12,853,494 to correct this prior period error.

2. 12 Months or Longer $ 9,420,327,557

(5) The Company continues to review payment performance, delinquency rates, and credit enhancements within the security structures and monitored the credit ratings of all its asset-backed security holdings. The Company performs various stress tests on the cash flow projections for asset-backed securities and in situations where it is determined the projected cash flows cannot support the contractual amounts due to the Company, other-than-temporary impairment is recognized. The Company recognized $10,336,536 of other-than-temporary impairments on asset-backed securities during 2025. In situations where the projected cash flows indicated the Company will receive the amounts it is contractually due and the Company has the intent and ability to hold the securities until recovery of its amortized cost, an other-than-temporary impairment is not recognized.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

The Company recognizes the securities lending program as a repurchase agreement which is accounted for as a secured borrowing and is discussed under Note 5F.

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

(1) As part of its investment strategy, the Company enters into repurchase agreements to increase the Company's investment returns. The program generates incremental spread income while only marginally increasing the aggregate portfolio credit exposure. Company policy requires a minimum of 100% of the fair value of securities sold (less a haircut) under repurchase agreements to be maintained as collateral.

The program results in a marginal increase in credit and liquidity risks. The majority of the repurchase agreements are evergreen and allow the Company the option to extend the agreements on pre-arranged terms which mitigates exposure prepayment exposure. The Company's asset portfolio is sufficiently liquid to be able to absorb situations where the maturity dates of the liability to return collateral is mismatched from the maturity of the invested asset. In addition, the Company's membership in the FHLB of Des Moines provides additional low cost liquidity.

A. Derivatives under *SSAP No. 86 – Derivatives*

(1) The Company utilizes foreign currency forwards to manage various exposures applicable to its investments and to better match the characteristics of the Company's liabilities. At December 31, 2025, the Company had foreign currency forwards with a fair value of $(199,221) and carrying value of $(199,221).

The Company utilizes financial options to hedge certain indexed liabilities. At December 31, 2025, the Company had financial options with a fair value of $1,365,471,957 and carrying value of $549,920,842.

The Company utilizes exchange trade index futures to hedge certain index liabilities. The futures contracts are adjusted to market values each day, with daily changes in the market value settled in cash daily through the Company's variation margin accounts maintained with the counterparty. At December 31, 2025, the Company had financial futures with a carrying value of $6,217,187.

In all cases, the Company generally limits its selection of counterparties that are obligated under these derivative contracts to those within an "A" rating or above. Entering into such agreements from financial institutions with long-standing performance records minimizes the credit risk.

(2) The Company uses derivative instruments for hedging purposes, although not all qualify for hedge accounting, and replication purposes. The change in fair value of hedging derivatives that do not qualify for hedge accounting is reported as a component of unrealized gain or loss for the period. The change in fair value of derivatives used in replication is not recognized to align the accounting for the derivative component to the accounting for the cash component of the replication asset.

(3) The Company recognizes income (expense) on interest rate swaps and foreign currency forwards through investment income.

The Company carries financial options at amortized cost, as permitted by IAC 191-97 and recognizes amortization of the options and any payout at expiration as net investment income.

The Company recognizes the daily change in variation margin on futures as net investment income.

(4) The Company did not have any derivative contracts with financial premiums.

(5) There were no gains or losses recognized in unrealized gains or losses during the reporting period representing the component of the derivative instrument's gain or loss excluded from the assessment of hedge effectiveness.

(6) There were no net gains or losses recognized in unrealized gains or losses during the reporting period resulting from derivatives that no longer qualify for hedge accounting.

(7) Cash flows associated with option and future derivative instruments, including related gains and losses, are reported in the statement of cash flows within Line 2, Net investment income. Net realized gains and losses from foreign currency forward derivative instruments are deferred in the Interest Maintenance Reserve (IMR), in accordance with SSAP No. 86.

(8) There were no swaps, forwards, financial options or financial futures accounted for as cash flow hedges of a forecasted transaction.

(9) a. The Company did not have any derivative contracts with premium costs or financing premiums.

(4) The Company has non-qualified non-contributory defined benefit retirement plans covering certain regional sales directors, general agents, and agents. The benefits are based on the agent's years of service and the annual premium produced by the agent still in force at his retirement. Since the plans are provided for the benefit of independent contractors, the plans are not tax-qualified plans under the Internal Revenue Code and are not subject to ERISA. The Company's funding and accounting policy is to make annual contributions based on the maximum and minimum levels prescribed by the Internal Revenue Code and ERISA, as if they are qualified plans, and to charge such contributions to expense in the year made. As of December 31, 2025 and 2024, the plan's accumulated benefit obligation was $19,232,766 and $18,564,608, respectively.

No contributions were made in 2025 or 2024.

(6) The Company has an agent's non-qualified deferred compensation plan. Since the plan is provided for the benefit of independent contractors, the plan is not a tax-qualified plan under the Internal Revenue Code and is not subject to ERISA. Under the terms of the plan, agents eligible to participate in the plan may elect to defer receipt of certain first year commissions that would otherwise be payable to the agent. A separate account is established for each agent participating in the plan to which all deferrals of the agent are credited. Agents eligible to participate in the plan may elect to have deferred commissions invested in certain mutual fund investments made available by the plan. The plan is an unfunded plan, but the Company has established a trust for the purpose of facilitating payments under the plan. The assets of the trust are assets of the Company and are subject to the claims and creditors of the Company as provided in the trust agreements. No agent or beneficiary of an agent has any beneficial ownership or preferred claim on the assets of the trust. The trust is intended to assist the Company in meeting the obligations under the plan and substantially conforms to the terms of the model trust described in the Internal Revenue Service Revenue Procedure 92-64 or any successor model trust. The fair value of the plan's assets as of December 31, 2025 and 2024 was $ 130,819,946 and $112,054,877 , respectively.

I. Impact of Medicare Modernization Act on Postretirement Benefits (INT 04-17)

(1) Recognition of the existence of the Act:

The Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) was signed into law in December of 2003. The Act included the following two new features to Medicare Part D that could affect the measurement of the accumulated postretirement benefit obligation (APBO) and net periodic postretirement cost for the Plan:

a. A federal subsidy (based on 28% of an individual beneficiary's annual prescription drug cost between $250 and $5,000), which is not taxable, to sponsors of retiree healthcare benefit plans that provide a prescription drug benefit that is a least actuarially equivalent to Medicare Part D; and

b. The opportunity for a retiree to obtain a prescription drug benefit under Medicare.

The Company has determined that, for the majority of the plan participants, the drug benefits provided by its existing postretirement health plan are actuarially equivalent to the new Medicare benefit, and as a result the Company is eligible for the government subsidy. Accordingly, the plan's accumulated postretirement benefit obligation was reduced upon the adoption of this new guidance. This reduction was treated as a deferred experience gain, which will be amortized as a reduction of net periodic postretirement costs over the average remaining service period of participating employees to receive benefits under the plan.

(2) Effects of the Subsidy in Measuring the Net Postretirement Benefit Cost - Not applicable to 2025 and 2024.

(3) Payment and subsidies:

The Company’s gross benefit payment for 2025 was $494,021 including the prescription drug benefit, and estimates future payments to be $516,350 in 2026.

(4) Fair value for fixed maturity securities, preferred stocks, and commons stocks is obtained primarily from independent pricing sources, SVO, vendor, broker quotes and fair value/cash flow models. Fair value is based on SVO price or quoted market prices, where available. For fixed maturities not actively traded, fair value is estimated using values obtained from independent pricing services or broker quotes. In some cases, such as private placements and certain mortgage backed securities, fair value is estimated by discounting expected future cash flows using a current market rate applicable to the yield, credit quality and maturity of the investments. The fair value of equity securities is based on quoted market prices, where available, and for those equity securities not actively traded, fair values are obtained from independent pricing services or from internal fair value/cash flow models.

Fair value for interest rate swaps, credit default swaps, interest rate floors and other derivatives is based on exchange prices, broker quoted prices or fair values provided by the counterparties. Variation margin accounts, consisting of cash balances applicable to open futures contracts, held by counterparties are reported at the cash balances, which is equal to fair value.

Non-insulated separate account assets consist of cash equivalents, preferred stocks and options, and non-insulated separate account liabilities consist of written options. The fair value methodology of these assets and liabilities are disclosed above. Variable separate account assets are reported at estimated fair value in the consolidated balance sheets based on quoted net asset values of the underlying mutual funds.
