NOTES TO FINANCIAL STATEMENTS

Note 1 - Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of North American Company ("the Company") have been prepared in conformity with the NAIC Annual Statement Instructions and the NAIC Accounting Practices and Procedures manual, subject to any deviations prescribed by its domiciliary state, Iowa, as follows:

1. Iowa Administrative Code 191 – Chapter 97, "Accounting for Certain Derivative Instruments Used to Hedge the Growth in Interest Credited for Indexed Insurance Products and Accounting for the Indexed Insurance Products Reserve" ("IAC 191-97"). This prescribed practice allows insurance companies domiciled in Iowa to account for eligible derivative assets at amortized cost, if the insurance company can demonstrate they meet the criteria for an economic hedge. Eligible derivative assets include call or put options that are purchased to hedge the growth in interest credited to an indexed product as a direct result of changes in the related external index or indices, or call or put options that are written to offset all or a portion of a purchased call or put option. Other derivative instruments such as index futures, swaps and swaptions that may be used to hedge the growth in interest credited to the policy as a direct result of changes in the related indices would still be accounted for at fair value since an amortized cost for those instruments does not exist. IAC 191-97 also prescribes that insurance companies determine indexed annuity reserve calculations based on the Guideline 35 Reserve assuming the fair value of the call options associated with the current index term is zero, regardless of the observable market for such options. At the conclusion of the index term, credited interest is reflected in the reserve as realized, based on actual index performance. This prescribed accounting practice must be applied to both the indexed reserves and the call/put options used to hedge indexed insurance products. The impact of applying this prescribed practice decreased the Company's statutory net income for the twelve months ended December 31, 2025 by $132,178,832 and the cumulative effect on Capital and Surplus at December 31, 2025 was a decrease of $332,037,492. The impact of applying this prescribed practice decreased the Company's statutory net income for the twelve months ended December 31, 2024 by $43,706,731 and the cumulative effect on Capital and Surplus at December 31, 2024 was a decrease of $199,858,660.

Under either the NAIC basis or the IAC 191-97, the Company elects to establish a voluntary reserve to offset the timing mismatch between the derivative instruments and the hedged liabilities, if that mismatch results in an increase in surplus. Under the IAC 191-97, a timing mismatch occurs related to the emergence of earnings. The impact of equity markets is reflected in investment income from futures during the policyholder's contract years, but is not reflected in the reserve until the policy anniversary, at which time the index credit is applied to the account value. The voluntary reserve established as of December 31, 2025 is $35,556,194 which offsets the portion of investment income on futures that has been determined to represent earnings that will be used to fund index credits that have not yet been applied to policy account balances. This eliminates the timing mismatch of the assets and liabilities calculated in accordance with IAC 191-97. Under the NAIC basis, a voluntary reserve of $367,593,686 would have been established as of December 31, 2025 to eliminate the timing mismatch of the assets and liabilities. The impact of applying the prescribed practice, net of the effect of the difference between the above mentioned voluntary reserve and the voluntary reserve that would have been established without the prescribed practice resulted in no impact to the Company's statutory net income for the twelve months ended December 31, 2025 and there was no cumulative impact on the Capital and Surplus at December 31, 2025. The voluntary reserve established as of December 31, 2024 is $45,060,528 which offsets the portion of investment income on futures that has been determined to represent earnings that will be used to fund index credits that have not yet been applied to policy account balances. This eliminates the timing mismatch of the assets and liabilities calculated in accordance with IAC 191-97. Under the NAIC basis, a voluntary reserve of $244,919,188 would have been established as of December 31, 2024 to eliminate the timing mismatch of the assets and liabilities. The impact of applying the prescribed practice, net of the effect of the difference between the above mentioned voluntary reserve and the voluntary reserve that would have been established without the prescribed practice resulted in no impact to the Company's statutory net income for the twelve months ended December 31, 2024 and there was no cumulative impact on the Capital and Surplus at December 31, 2024. Because it is established under NAIC SAP, the effects of voluntary reserves are not included in reconciliation lines (2) or (6) in the following table.

2. Iowa Administrative Code 191 – Chapter 43, "Annuity Mortality Tables For Use in Determining Reserve Liabilities For Annuities" ("IAC 191-43"), allows a prescribed practice for Iowa domiciled companies. This prescribed practice allows insurance companies domiciled in Iowa to use the Annuity 2000 Mortality Table for determining the minimum standard of valuation for annuities issued during 2015. SSAP 51 requires the 2012 IAR Mortality Table for determining the minimum standard of valuation for annuities issued on or after January 1, 2015. The impact of applying this prescribed practice decreased the Company's statutory net income for the twelve months ended December 31, 2025 by $6,429,202 and the cumulative effect on Capital and Surplus at December 31, 2025 was an increase of $48,514,035. The impact of applying this prescribed practice decreased the Company's statutory net income for the twelve months ended December 31, 2024 by $807,784 and the cumulative effect on Capital and Surplus at December 31, 2024 was an increase of $54,943,237.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Iowa is shown below.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Note 2 - Accounting Changes and Corrections of Errors

The Statutory Accounting Principles Working Group's new bond definition and related guidance was effective January 1, 2025. The new guidance includes a principle's based definition as to what is considered a bond and reported on Schedule D, provides new measurement guidance for investments that do not meet the definition of a bond, and requires new categorization for bonds on Schedule D. Debt securities that do not meet the definition of a bond are now reported as other invested assets on Schedule BA and are carried at the lower of amortized cost or fair value. In addition, the definition of and accounting for securities that contain characteristics of both debt and equity was clarified.

As a result of the adoption of the new guidance, the Company identified debt securities with an aggregate book adjusted carrying value of $447,360,094 that do not qualify as bonds and were therefore reclassified off Schedule D. Securities with an aggregate book adjusted carrying value of $277,190,709 that were reclassified off Schedule D and resulted in a change in measurement basis under the lower of amortized cost or fair value approach. The Company recognized an unrealized loss on these securities of $47,574,199, in change in net unrealized capital gains (losses) as of January 1, 2025.

The Company also adopted the new accounting for residual tranches or interests as of January 1, 2025. This guidance allows the Company to 1) carry residual interests at the lower of amortized cost under the allowance earned yield method or fair value, or 2) apply a cost recovery method. The Company elected to carry residual interests at the lower of amortized cost under the allowable earned yield or fair value. As a result of the adoption of this guidance, the Company recognized a gain of $3,421,481, in net realized capital gains (losses) in the Statement of Operations, on the population of residual interests previously accounted for under the equity method. The new guidance is applicable to residual interests previously accounted for under SSAP No. 43 on a prospective basis with no transition impact.

(4) All impaired securities (fair value is less than cost or amortized cost) for which an other than temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:

1. Less than 12 Months $ 3,624,545
2. 12 Months or Longer $ 496,441,543

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months $ 927,180,511
2. 12 Months or Longer $ 6,122,268,261

(5) Asset-backed securities primarily consist of residential mortgage-backed securities ("RMBS"), commercial mortgage-backed securities ("CMBS") and other asset-backed securities ("ABS"). The unrealized losses on RMBS are concentrated in the non-agency sector and are primarily due to concerns regarding mortgage defaults on some specific exposures. These concerns result in some illiquidity in the market and spread widening on those securities that are being traded. The unrealized losses on CMBS are primarily attributable to illiquidity in that sector and concerns regarding the potential for future commercial mortgage defaults. The unrealized losses in ABS are primarily attributable to illiquidity in some sectors (primarily aircraft) and concerns regarding the potential for full recovery. The Company continues to review payment performance, delinquency rates, and credit enhancements within the security structures and monitored the credit ratings of all its asset-backed securities. The Company performs various stress tests on the cash flow projections for its asset-backed securities and in situations where it is determined the projected cash flows cannot support the contractual amounts due the Company, an other-than-temporary impairment is recognized. The Company did recognize other-than-temporary impairments during 2025 in situations where: (a) the projected cash flows indicated the Company would not receive all amounts contractually due from the loan-backed securities; or (b) the Company no longer has the intent and ability to hold the securities until recovery of its amortized cost.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

The Company recognizes the securities lending program as a repurchase agreement which is accounted for as a secured borrowing and is discussed under Note 5F.

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

(1) As part of its investment strategy, the Company enters into repurchase agreements to increase the Company's investment returns. The program generates incremental spread income while only marginally increasing the aggregate portfolio credit exposure. Company policy requires a minimum of 100% of the fair value of securities sold (less a haircut) under repurchase agreements to be maintained as collateral.

The program results in a marginal increase in credit and liquidity risks. The majority of the repurchase agreements are evergreen and allow the Company the option to extend the agreements on pre-arranged terms which mitigates exposure prepayment exposure. The Company's asset portfolio is sufficiently liquid to be able to absorb situations where the maturity dates of the liability to return collateral is mismatched from the maturity of the invested asset. In addition, the Company's membership in the FHLB of Des Moines provides additional low cost liquidity.

Note 8 - Derivative Instruments

A. Derivatives under *SSAP No. 86 – Derivatives*

(1) The Company utilizes foreign currency forwards to manage various exposures applicable to its investments and to better match the characteristics of the Company's liabilities. At December 31, 2025, the Company had foreign currency forwards with a fair value of $(103,895) and carrying value of $(103,895).

The Company utilizes financial options to hedge certain indexed liabilities. At December 31, 2025, the Company had financial options with a fair value of $1,271,850,529 and carrying value of $620,184,228.

The Company utilizes exchange trade index futures to hedge certain index liabilities. The futures contracts are adjusted to market values each day, with daily changes in the market value settled in cash daily through the Company's variation margin accounts maintained with the counterparty. At December 31, 2025, the Company had financial futures with a carrying value of $17,671,412.

In all cases, the Company generally limits its selection of counterparties that are obligated under these derivative contracts to those within an "A" rating, or above. Entering into such agreements from financial institutions with long-standing performance records minimizes the credit risk.

(2) The Company uses derivative instruments for hedging purposes, although not all qualify for hedge accounting, and replication purposes. The change in fair value of hedging derivatives that do not qualify for hedge accounting is reported as a component of unrealized gain or loss for the period. The change in fair value of derivatives used in replication is not recognized to align the accounting for the derivative component to the accounting for the cash component of the replication asset.

(3) The Company recognizes income (expense) on interest rate swaps and foreign currency forwards through investment income.

The Company carries financial options at amortized cost, as permitted by IAC 191-97 and recognizes amortization of the options and any payout at expiration as net investment income.

The Company recognizes the daily change in variation margin on futures as net investment income.

(4) The Company did not have any derivative contracts with financing premiums.

(5) There were no gains or losses recognized in unrealized gains or losses during the reporting period representing the component of any derivative instrument's gain or loss excluded from the assessment of hedge effectiveness.

(6) There were no net gains or losses recognized in unrealized gains or losses during the reporting period resulting from derivatives that no longer qualify for hedge accounting.

(7) Cash flows associated with option and future derivative instruments, including related gains and losses, are reported in the statement of cash flows within Line 2, Net investment income. Net realized gains and losses from foreign currency forward derivative instruments are deferred in the Interest Maintenance Reserve (IMR), in accordance with SSAP No. 86.

(8) There are no swaps, floors, forwards, financial options or financial futures accounted for as cash flow hedges of a forecasted transaction.

(9) a. The Company did not have any derivative contracts with premium costs or financing premiums.

(10) The Company did not have any aggregate excluded components.

B. Derivatives under *SSAP No. 108 – Derivatives Hedging Variable Annuity Guarantees*

Fair value for interest rate swaps, credit default swaps, interest rate floors and other derivatives is based on exchange prices, broker quoted prices or fair values provided by the counterparties. Variation margin accounts, consisting of cash balances applicable to open futures contracts, held by counterparties are reported at the cash balances, which is equal to fair value.
