ANNUAL STATEMENT FOR THE YEAR 2023 OF THE MIDLAND NATIONAL LIFE INSURANCE COMPANY

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of Midland National Life Insurance Company ("Midland National" or "the Company") have been prepared in conformity with the NAIC Annual Statement Instructions and the NAIC Accounting Practices and Procedures manual, subject to any deviations prescribed by its domiciliary state, Iowa, as follows:

1. Iowa Bulletin 07-06 – In September 2006 the Commissioner of Insurance of the State of Iowa issued Bulletin 07-06 that allows a prescribed practice for Iowa domiciled companies. This prescribed practice instructs insurance companies to use other than market value for assets held in separate accounts where general account guarantees are present on such separate accounts. Based on this the Company adopted Bulletin 07-06 in 2006 and presents the assets on its BOLI, PRT and RILA Separate Accounts at book value. The impact of applying this prescribed practice had no impact on 2023 statutory net income; however, Capital and Surplus as of December 31, 2023 is increased by \$253,579,511 as a result of this prescribed practice. The impact of applying this prescribed practice had no impact on 2022 statutory net income; however, Capital and Surplus as of December 31, 2022 is increased by \$358,693,642 as a result of this prescribed practice.

2. Iowa Administrative Code 191 – Chapter 97, "Accounting for Certain Derivative Instruments Used to Hedge the Growth in Interest Credited for Indexed Insurance Products and Accounting for the Indexed Insurance Products Reserve" ("IAC 191-97"). This prescribed practice allows insurance companies domiciled in Iowa to account for eligible derivative assets at amortized cost, if the insurance company can demonstrate they meet the criteria for an economic hedge. Eligible derivative assets include call or put options that are purchased to hedge the growth in interest credited to an indexed product as a direct result of changes in the related external index or indices, or call or put options that are written to offset all or a portion of a purchased call or put option. Other derivative instruments such as index futures, swaps and swaptions that may be used to hedge the growth in interest credited to the policy as a direct result of changes in the related indices would still be accounted for at fair value since an amortized cost for those instruments does not exist. IAC 191-97 also prescribes that insurance companies determine indexed annuity reserve calculations based on the Guideline 35 Reserve assuming the fair value of the call option(s) associated with the current index term is zero, regardless of the observable market for such option(s). At the conclusion of the index term, credited interest is reflected in the reserve as realized, based on actual index performance. This prescribed accounting practice must be applied to both the indexed reserves and the call/put options used to hedge indexed insurance products. The impact of applying this prescribed practice decreased the Company's statutory net income for the twelve months ended December 31, 2023 by \$348,605,856 and the cumulative effect on Capital and Surplus at December 31, 2023 was a decrease of \$276,990,747. The impact of applying this prescribed practice increased the Company's statutory net income for the twelve months ended December 31, 2022 by \$306,761,783 and the cumulative effect on Capital and Surplus at December 31, 2022 was an increase of \$71,615,109.

Under either the NAIC basis or the IAC 191-97, the Company elects to establish a voluntary reserve to offset the timing mismatch between the derivative instruments and the hedged liabilities, if that mismatch results in an increase in surplus. Under the IAC 191-97, a timing mismatch occurs related to the emergence of earnings. The impact of equity markets is reflected in investment income from futures during the policyholder's contract years, but is not reflected in the reserve until the policy anniversary, at which time the index credit is applied to the account value. The voluntary reserve established as of December 31, 2023 is \$6,373,762 which offsets the portion of investment income on futures that has been determined to represent earnings that will be used to fund index credits that have not yet been applied to policy account balances. This eliminates the timing mismatch of the assets and liabilities calculated in accordance with IAC 191-97. Under the NAIC basis, a voluntary reserve of \$283,364,509 would have been established as of December 31, 2023 to eliminate the timing mismatch of the assets and liabilities. The impact of applying this prescribed practice, net of the effect of the difference between the above mentioned voluntary reserve and the voluntary reserve that would have been established without the prescribed practice resulted in a decrease to the Company's statutory net income of \$71,615,109 for the twelve months ended December 31, 2023 and there was no cumulative impact on the Company's Capital and Surplus at December 31, 2023. The voluntary reserve established as of December 31, 2022 was \$0 as the timing mismatch between the futures and the hedged liabilities resulted in a \$1,370,214 decrease to the Company's statutory net income and surplus calculated in accordance with IAC 191-97. Under the NAIC basis, a voluntary reserve of \$0 would have been established as of December 31, 2022 as the timing mismatch between futures and hedged liabilities would have resulted in a \$72,985,323 decrease to the Company's statutory net income and surplus. The impact of applying this prescribed practice, net of the effect of the difference between the above mentioned voluntary reserve and the voluntary reserve that would have been established without the prescribed practice resulted in an increase to the Company's statutory net income of \$71,615,109 for the twelve months ended December 31, 2022 and increased the Company's Capital and Surplus by \$71,615,109 at December 31, 2022. Because it is established under NAIC SAP, the effects of voluntary reserves are not included in reconciliation lines (2) or (6) in the following table.

3. Iowa Administrative Code 191 – Chapter 43, "Annuity Mortality Tables For Use in Determining Reserve Liabilities For Annuities" ("IAC 191-43") allows a prescribed practice for Iowa domiciled companies. This prescribed practice allows insurance companies domiciled in Iowa to use the Annuity 2000 Mortality Table for determining the minimum standard of valuation for annuities issued during 2015. SSAP 51 requires the 2012 IAR Mortality Table for determining the minimum standard of valuation for annuities issued on or after January 1, 2015. The impact of applying this prescribed practice increased the Company's statutory net income for the twelve months ended December 31, 2023 by \$150,307 and the cumulative effect on Capital and Surplus at December 31, 2023 was an increase of \$20,236,751. The impact of applying this prescribed practice decreased the Company's statutory net income for the twelve months ended December 31, 2023 by \$1,247,232 and the cumulative effect on Capital and Surplus at December 31, 2022 was an increase of \$20,176,444.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Iowa is shown below.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of the financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. The Company performs various stress tests on the cash flow projections for loan-backed securities and in situations where it is determined the projected cash flows cannot support the contractual amounts due to the Company, other-than-temporary impairment is recognized. The Company recognized \$15,332,557 of other-than-temporary impairments on loan-backed securities during 2023. E. Dollar Repurchase Agreements and/or Securities Lending Transactions

The Company recognizes the securities lending program as a repurchase agreement which is accounted for as a secured borrowing and is discussed under Note 5F.

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing

- (1) As part of its investment strategy, the Company enters into repurchase agreements to increase the Company's invest returns. The program generates incremental spread income while only marginally increasing the aggregate portfolio credit exposure. Company policy requires a minimum of 100% of the fair value of securities sold (less a haircut) under repurchase agreements to be maintained as collateral.

The program results in a marginal increase in credit and liquidity risks. The majority of the repurchase agreements are evergreen and allow the Company the option to extend the agreements on pre-arranged terms which mitigates prepayment exposure. The Company's asset portfolio is sufficiently liquid to be able to absorb situations where the maturity dates of the liability to return collateral is mismatched from the maturity of the invested asset. In addition, the Company's membership in the FHLB of Des Moines provides additional low cost liquidity.

At December 31, 2023, the Company had interest rate swaps and foreign currency forwards with a fair value of \$(7,553,753) and carrying value of \$(7,553,753).

- (5) There were no gains or losses recognized in unrealized gains or losses during the reporting period representing the component of the derivative instrument's gain or loss excluded from the assessment of hedge effectiveness.

- E. Defined Contribution Plans
- (1) The Company offers a 401(k) plan to qualified employees. The Company does not provide a contribution match so there is no cost for this plan.
- (2) The Company has a deferred compensation program for select senior officers. The level of participation is based upon company growth and/or statutory maximum contribution levels for qualified retirement programs.
- (3) The Company has a long-term incentive plan for select senior officers. The plan provides compensation based upon the achievement of specific financial results.
- (4) The Company has non-qualified non-contributory defined benefit retirement plans covering certain regional sales directors, general agents, and agents. The benefits are based on the agent's years of service and the annual premium produced by the agent still in force at his retirement. Since the plans are provided for the benefit of independent contractors, the plans are not tax-qualified plans under the Internal Revenue Code and are not subject to ERISA. The Company's funding and accounting policy is to make annual contributions based on the maximum and minimum levels prescribed by the Internal Revenue Code and ERISA, as if they are qualified plans, and to charge such contributions to expense in the year made. As of December 31, 2023 and 2022, the plan's accumulated benefit obligation was \$19,068,441 and \$19,182,102, respectively.
- (5) The Company has a non-qualified non-contributory incentive deferral compensation plan for which all Regional Sales Directors are eligible. Since the Plan is provided for the benefit of independent contractors, the Plan is not tax-qualified under the Internal Revenue Code and it is not subject to ERISA. The Company contributes a percentage of each participating Regional Sales Director's qualifying renewal compensation to the Plan. Upon retirement, the accumulation of these contributions will purchase a retirement benefit, provided the Regional Sales Director's annual compensation shall have exceeded the appropriate minimum requirement for each of the ten years. No contributions were made in 2023 or 2022.
- (6) The Company has an agent's non-qualified deferred compensation plan. Since the plan is provided for the benefit of independent contractors, the plan is not a tax-qualified plan under the Internal Revenue Code and is not subject to ERISA. Under the terms of the plan, agents eligible to participate in the plan may elect to defer receipt of certain first year commissions that would otherwise be payable to the agent. A separate account is established for each agent participating in the plan to which all deferrals of the agent are credited. Agents eligible to participate in the plan may elect to have deferred commissions invested in certain mutual fund investments made available by the plan. The plan is an unfunded plan, but the Company has established a trust for the purpose of facilitating payments under the plan. The assets of the trust are assets of the Company and are subject to the claims and creditors of the Company as provided in the trust agreements. No agent or beneficiary of an agent has any beneficial ownership or preferred claim on the assets of the trust. The trust is intended to assist the Company in meeting the obligations under the plan and substantially conforms to the terms of the model trust described in the Internal Revenue Service Revenue Procedure 92-64 or any successor model trust. The fair value of the plan's assets as of December 31, 2023 and 2022 was \$92,839,102 and \$81,375,540, respectively.
- F. Multiemployer Plans
- Not applicable to the Company.
- G. Consolidated/Holding Company Plans
- The Company participates in an Employee Stock Ownership Plan ("ESOP") covering full-time employees. The majority of SEI's stock is held in the ESOP as unallocated shares. The ESOP currently owns all of the outstanding stock of SEI. Compensation expense is recognized as shares to participants are committed to be released. The expense for 2023 and 2022 was \$43,268,130 and \$30,558,093, respectively.
- H. Postemployment Benefits and Compensated Absences
- An obligation for compensated absences is accrued in accordance with SSAP No. 11.
- I. Impact of Medicare Modernization Act on Postretirement Benefits (INT 04-17)

- (1) Recognition of the existence of the Act:
- The Medicare Prescription Drug, Improvement and Modernization Act of 2003 (the Act) was signed into law in December of 2003. The Act included the following two new features to Medicare Part D that could affect the measurement of the accumulated postretirement benefit obligation (APBO) and net periodic postretirement cost for the Plan:
- a. A federal subsidy (based on 28% of an individual beneficiary's annual prescription drug cost between \$250 and \$5,000), which is not taxable, to sponsors of retiree healthcare benefit plans that provide a prescription drug benefit that is a least actuarially equivalent to Medicare Part D; and
- b. The opportunity for a retiree to obtain a prescription drug benefit under Medicare.

The Company has determined that, for the majority of the plan participants, the drug benefits provided by its existing postretirement health plan are actuarially equivalent to the new Medicare benefit, and as a result the Company is eligible for the government subsidy. Accordingly, the plan's accumulated postretirement benefit obligation was reduced upon the adoption of this new guidance. This reduction was treated as a deferred experience gain, which will be amortized as a reduction of net periodic postretirement costs over the average remaining service period of participating employees to receive benefits under the plan.

(2) Effects of the Subsidy in Measuring the Net Postretirement Benefit Cost - Not applicable to 2023 and 2022.

ANNUAL STATEMENT FOR THE YEAR 2023 OF THE MIDLAND NATIONAL LIFE INSURANCE COMPANY

F. Subprime-Mortgage-Related Risk Exposure

(1) A subprime mortgage is defined as a mortgage with one or more of the following attributes: weak credit score, high debt-to-income ratio, high loan-to-value ratio or undocumented income. During 2008 and early 2009, the deterioration in the subprime mortgage market had an adverse impact on the overall credit markets, particularly related to the fair values of collateralized mortgage obligations (CMO's) and other asset-backed securities.
